

The Wisconsin Nurses Association is presenting a
webinar entitled

***Nurse Fatigue – Nurses Practicing
Under the Influence***

Friday, January 20, 2012

12:00 pm – 1:00 pm CST

(1:00 pm -2:00 pm EST)

After the groundbreaking 1999 report of the Institute of Medicine (IOM), *To Err is Human: Building a Safer Health System* which revealed the degree of harmful errors in health care, safety became paramount and hospitals have initiated performance improvement efforts. Research shows there is a relationship between the hours nurse's work and their risk for error. Join Deborah Peetz as she presents the myths and facts of sleep deprivation, identifies barriers and strategies to change, discusses legal implications and offers current research in this engaging one hour webinar.
