**WNA Clinical and Interprofessional Education Considerations for Patient-Centered Team-Based Care**

**Friday, October 21, 2016**
**Marriott Hotel & Conference Center, Middleton**

This educational symposium will provide health care related faculty, instructors, clinic setting practitioners and other clinical staff the opportunity to learn about patient-centered team-based care from an Interprofessional (Team-Based) Practice or Interprofessional Education (IPE) perspective.

This day-long offering will include information on national and state trends, clinical and educational presenters, research findings, poster sessions and interactive discussion about moving Wisconsin forward in the area of interprofessional education and interprofessional practice, with a focus on chronic disease management in the area of team-based care.

WNA Clinical and Interprofessional Education Considerations for Patient-Centered Team-Based Care

Friday, October 21, 2016
Marriott Hotel & Conference Center, Middleton
7:30 am – 12:45 pm

WNA received a CDC Chronic Disease and Prevention Grant awarded by the Department of Health through the Division of Public Health to evaluate the delivery of patient-centered team-based care services for patients with hypertension and diabetes. Having a prepared interprofessional workforce is key to the success of a team-based care delivery system. Applications were accepted from the following groups to display posters and discuss efforts to promote Interprofessional Education and Patient-Centered Team-Based Care within their practice setting – we thank them for their willingness to share their expertise.

There will be project representatives available at each poster during break and lunch times – symposium participants are encouraged to visit as many displays as possible before the afternoon educational tracks begin.
